

Note: Traineeships are delivered by the Education and Training Boards (ETBs). The decision by an ETB to deliver a traineeship is determined based on the needs identified in collaboration with industry/employers in the sector and local requirements.

Therefore, not all ETBs will offer every traineeship; likewise, elements of a traineeship such as the content, award, duration etc may vary based on the needs identified.

The information below is a sample only; it gives an idea of what this traineeship involves but may not be replicated exactly across ETBs offering this traineeship.

SAMPLE DESCRIPTOR

Life Sciences Manufacturing Operations Traineeship

The aim of this programme is to provide the learner with the knowledge, skills and competence to work both independently and under supervision performing manufacturing tasks using a range of continuous improvement methodologies and complying with relevant health, safety and environmental regulations and controls in the life sciences industry. On successful completion of the programme, learners may progress to further education and training.
